### GOT WEEDS???

Whether you live, work or play in Colorado, noxious weeds threaten many of the resources that you have come to appreciate, value, or depend upon. By interfering with natural processes, native species and management of our large, aggressive, non-native plants are rapidly changing the face of Colorado's landscape. Imagine local ponds and streams drying up and disappearing, songbirds you once saw and heard vanishing forever, your neighborhood open space changing from a beautiful mixture of native plants that flower throughout much of the year to fields and hillsides covered with thistles and knapweeds.

Events like these have occurred countless times in many other western states and are increasing across Colorado as noxious weeds spread and become more widely seen throughout our beautiful state.

As a member of a Homeowner Association in Park County who wants to maintain the beauty and character of your community, we strongly encourage you to take an active role in identifying and eradicating weeds on your property and in your subdivision at large.

### HOW CAN YOU HELP?

- Call our office for assistance. We operate the Weed Management Program for Teller and Park counties and offer advice and weed spraying services. We can also put you in touch with agencies that have cost-share programs available.
- Request a colorful brochure from our office that illustrates and describes the noxious weeds specific to our counties.
- Check out these websites for more information:
